

Suivi photographique du littoral de l'Hérault

Guide terrain – Mars 2020

Pour chaque commune littorale, le pôle de l'EID Méditerranée mène un **suivi photographique terrestre** de l'évolution du littoral, selon des points et axes de prise de vue référencés. Cette année une refonte du suivi photo a été réalisée avec de nouveaux points photos sélectionnés et la mise en place d'un protocole de suivi plus fin. Ce guide les présente un à un par commune.

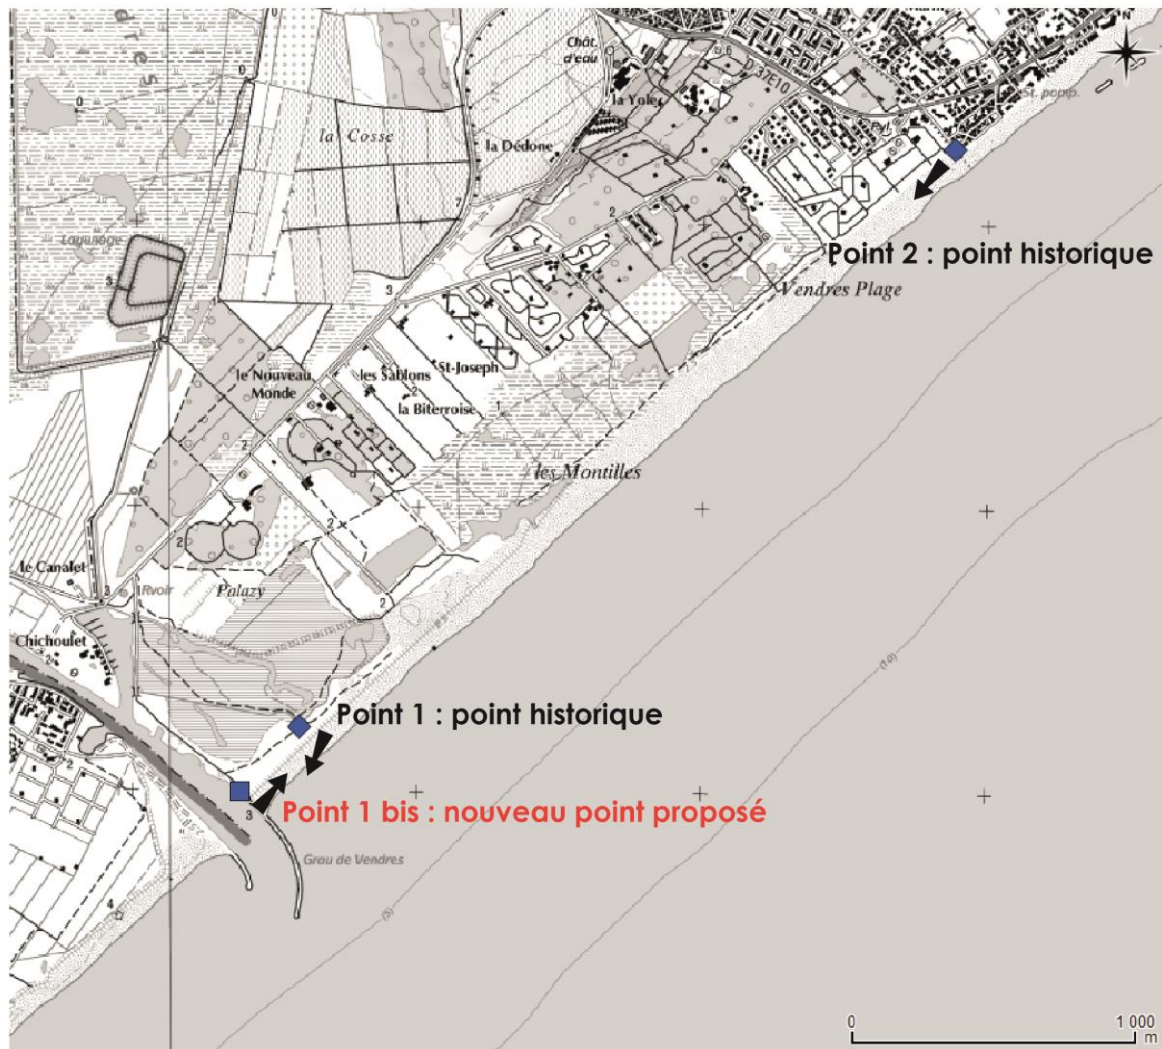

Réglages de l'appareil :

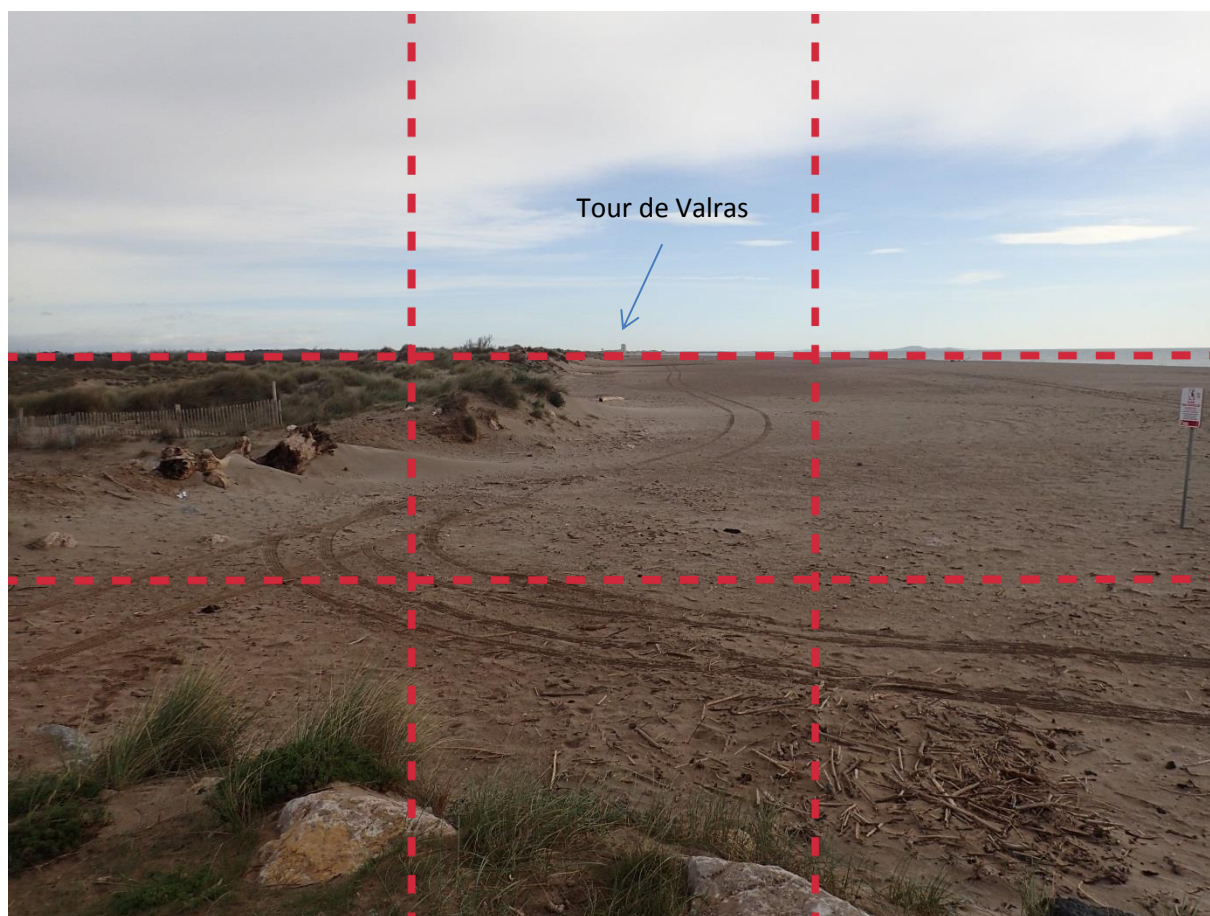

- Photo 4 :3
- Faire apparaître les grilles guide et se servir des repères
- Ne pas faire apparaître l'heure sur la photo

Vendres

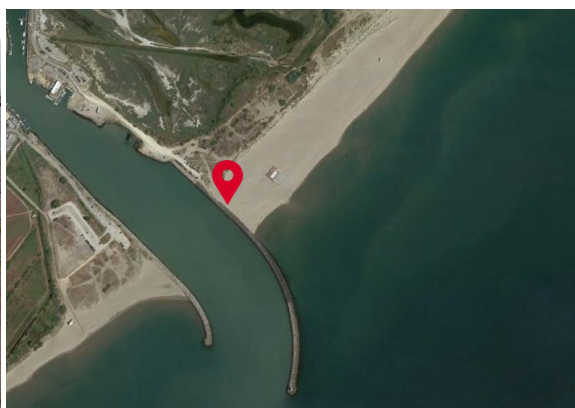

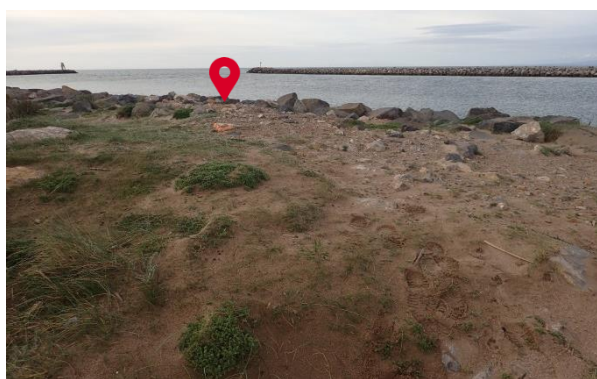

- Localisation des points proposés
